▶ پایگاه Clinical Key ، مجموعه ای از محصولات انتشارات **Elsevier** می باشد.

▶ یک موتور جستجوی بالینی و یک پایگاه اطلاعاتی قدرتمند که جامعیت ، مورد اطمینان بودن و سرعت در بازیابی اطلاعات و پاسخگویی از مزیت‌های آن محسوب می شود.

▶ مجموعه ای است از مجلات ، کتاب ، راهنماها ، اطلاعات دارویی ، تصاویر ، ویدیوهای پزشکی و جراحی و شواهد بالینی مورد نیاز پزشکان ، پیرا پزشکان ، دانشجویان و بیماران

- این مجموعه حاوی :
- بیش از ۵۰۰ عنوان مجله پزشکی و جراحی از انتشارات *Elsevier*
- بیش از ۱۱۰۰ عنوان کتب مرجع پزشکی و جراحی
- مجموع کامل ۵۷ عنوان مجله از مجلات *Clinics of north America*
- آموزش بیش از ۳۵۰ تکنیک جراحی و ۴۵۰ عنوان شرح عمل جراحی
- مقالات بالینی و شرح بیماریهای مبتنی بر شواهد بیش از ۷۵۰ بیماری
- دسترسی به بیش از ۱۵۰۰۰ راهنمای آموزش بیمار
- حدود ۱۳۰۰۰ ویدیو پزشکی
- حدود ۵۰۰۰۰۰۰ تصویر پزشکی
- بیش از ۴۰۰۰ راهنمای عملی بالینی
- اطلاعات بیش از ۲۹۰۰ دارو که توسط شرکت *Gold standard* فراهم شده و به روزرسانی می شود.
- ۲۰ میلیون خلاصه مقاله مدلاین که به صورت روزانه از کتابخانه ملی پزشکی به این مجموعه اضافه می گردد.

برای استفاده بهتر از امکانات سایت مانند ذخیره نتایج جستجو و بازیابی آنها در مراجعات بعدی، ثبت نام (Register) کنید. پس از انجام ثبت نام، از گزینه Login برای وارد شدن به سایت استفاده نمایید.

Infections in the Elderly

دسترسی به فولتکست

Kent B. Crossley and Phillip K. Peterson

Mandell, Douglas, and Bennett's Principles and Practice of Infectious Diseases, 315, 3459-3465.e3

Keywords

bacteremia, decubitus, elderly, enterohemorrhagic *Escherichia coli*, herpes zoster, influenza, pneumonia, tuberculosis, urinary tract infection, West Nile virus

Short View Summary

GENERAL CONSIDERATIONS

- People living past 65 years of age are rapidly increasing in number.
- Individuals older than age 65 years have a higher incidence of most infections than do younger people.
- For nearly all infections, clinical manifestations are more subtle in the elderly.

URINARY TRACT INFECTION

- Asymptomatic bacteriuria should not be treated.
- Symptomatic infection is often caused by organisms other than *Escherichia coli*.
- Extended-duration therapy (i.e., >7 days) of symptomatic infection is not needed in either men or women.

نحوه جستجوی مقاله در سایت کلینیکال کی

با وارد کردن کلمه geriatric در کادر جستجو و انتخاب Journals ، مقالاتی با موضوع geriatric نمایش داده خواهد شد. فولتکست مقالات با کلیک بر روی آیکن Pdf قابل دانلود است.

برای اخذ کردن مقاله می توان از Filter موجود در بالای مقالات بازیابی شده استفاده کرد:

۱-نوع مقاله را در قسمت Source type مشخص می کنیم:

* مقالات دارای فولتکست (Full text article):این مقالات را می توان در سایت مطالعه کرد یا متن کامل آنرا با کلیک بر روی Pdf دریافت و ذخیره و پرینت کرد.

* مقالات مدلاین (Medline) : این مقالات بصورت چکیده در سایت هستند و برای دریافت متن کامل مقاله ، شما را آخر چکیده مقاله ، در قسمت **NLM citation ID** به آدرس آن در سایت پابمد ارجاع می دهند.

۲-نوع مطالعه را در قسمت Study type مشخص می کنیم:

* systematic review

* meta analysis

* randomized control trials

* narrative review

۳- مقاله را می توان از نظر موضوعی اخص تر کرد. برای این منظور از Specialties استفاده می کنیم. با باز کردن لینک کشویی مزبور ، موضوعات اخص تر را می توان دید و از آنها برای جستجوی بهتر استفاده کرد.

۴- و در آخر ، مقالات بازیابی شده را در حیطه زمانی مشخص می توان جستجو کرد.

Help & Feedback

سمت راست صفحه ، اطلاعات مجله را می توان دید و سمت چپ تورق سریعتر در مقاله را ممکن می کند.

The screenshot shows the ClinicalKey website interface. At the top, there are browser tabs and navigation links for English, CME, Login, and Register. The main navigation bar includes 'Journals' and 'geriatric', with a search bar and 'Back to results' link. The article title is 'Regulatory development of geriatric medicines: To GIP or not to GIP?'. The author list includes Bart De Spiegeleer, Evelien Wynendaele, Nathalie Bracke, Lieselotte Verysse, Lien Taevernier, Agnes Degroote, and Sofie Stalmans. The article is from 'Ageing Research Reviews', Volume 27, Pages 23-36, Copyright © 2016 Elsevier B.V.

Annotations in Persian are present on the right side of the page:

- 'ذخیره' (Save) pointing to the article title.
- 'فولتکست مقاله' (Full-text article) pointing to the article title.
- 'ایمیل کردن' (Email) pointing to the email icon.
- 'پرینت' (Print) pointing to the print icon.
- 'اطلاعات مجله' (Journal information) pointing to the journal title 'Ageing Research Reviews'.

The 'Graphical abstract' section shows a flowchart with three columns: 'Pharmaceutical Industry', 'Regulatory authorities', and 'Healthcare Providers'. On the right, it lists 'Pediatric Patients', 'Adults', and 'Geriatric Patients'. Arrows indicate interactions: 'Pediatric Patients' with 'Pediatric Investigation Plan (PIP)', 'Adults' with 'Current clinical trials' leading to 'Current drugs', and 'Geriatric Patients' with a question mark and 'Geriatric Investigation Plan (GIP)'. A vertical 'Help & Feedback' button is on the far right.

The 'Highlights' section contains one bullet point: '• There is lack of knowledge on the benefit/risk ratio of medicines in the elderly.'

اگر خواهان مقالاتی باشیم که فقط چکیده دارند می توانیم در کادر اصلی جستجو ، از منوی کشویی سمت چپ گزینه مدلاین را انتخاب کنیم و کلید واژه مورد نظر را در قسمت جستجو تایپ کنیم.....مقالاتی که بازیابی می شوند دارای چکیده و فاقد فولتکست خواهند بود.

The screenshot shows the ClinicalKey website interface. At the top, there are navigation links for 'English', 'CME', 'Login', and 'Register'. The main header features the 'ClinicalKey' logo and the tagline 'Lead with answers.'. Below the header is a search bar containing the text 'geriatric'. A dropdown menu is open, displaying various search suggestions categorized into 'Suggestions', 'Books and Journals', and 'Authors'. A callout box with an orange background and a curved arrow points to the 'Medline' option in the 'Suggestions' list. The callout text reads: 'با انتخاب گزینه مدلاین ، تنها مدارک دارای چکیده بازیابی خواهند شد.' (By selecting the Medline option, only articles with abstracts will be retrieved.)

Abstract

with rare missense alleles in genes other than CFI. Genotyping in 5,115 independent samples confirmed associations with AMD of an allele in C3 encoding p.Lys155Gln (replication $P = 3.5 \times 10^{-5}$, OR = 2.8; joint $P = 5.2 \times 10^{-9}$, OR = 3.8) and an allele in C9 encoding p.Pro167Ser (replication $P = 2.4 \times 10^{-5}$, OR = 2.2; joint $P = 6.5 \times 10^{-7}$, OR = 2.2). Finally, we show that the allele of C3 encoding Gln155 results in resistance to proteolytic inactivation by CFH and CFI. These results implicate loss of C3 protein regulation and excessive alternative complement activation in AMD pathogenesis, thus informing both the direction of effect and mechanistic underpinnings of this disorder.

Acetaminophen

Acephen | Aceta | Actamin | Anacin Aspirin Free | Apra ...

Drug Information Provided By Gold Standard

Description: Acetaminophen (APAP, paracetamol) is a para-aminophenol analgesic and the active metabolite of phenacetin. Due to the toxic effects of phenacetin at therapeutic doses and the availability of acetaminophen, phenacetin is no longer used. Acetaminophen possesses analgesic and antipyretic activity similar to aspirin; however, acetaminophen has no peripheral antiinflammatory activity or effects on platelet function. Acetaminophen was first used in clinical medicine in the 1890's. It is effective in the relief of both acute and chronic pain and may be preferred over NSAIDs due to fewer hematologic, GI, and renal effects. Acetaminophen is the preferred analgesic/antipyretic for patients in whom aspirin is contraindicated and in those with underlying renal disease for episodic, though not chronic, use.²³⁹⁷⁷ In addition, acetaminophen has been recommended by the American Lung Association as the first line treatment for aches and pains associated with the flu, by the American Geriatrics Society for both minor and persistent pain in elderly patients³⁵⁶¹⁴, and by the American College of Rheumatology as first-line therapy for osteoarthritis of the hip or knee³⁵⁶⁷⁶. The drug has a history of safe and effective use; however, unintentional or intentional misuse of acetaminophen is the number one cause of acute hepatic failure in the U.S.³²²⁰² Acetaminophen was first approved by the FDA in 1950. Intravenous acetaminophen (Ofirmev) was approved by the FDA in November 2010 for the treatment of pain and fever in adults, adolescents, and children over the age of 2 years.⁴²²⁸⁹

Mechanism of Action: The exact mechanism of action is unknown, but acetaminophen is thought to mediate its actions centrally through activation of the descending serotonergic pathways. Acetaminophen is believed to increase the pain threshold by inhibiting prostaglandin (PG) synthesis through the cyclooxygenase (COX) pathway, similar to nonsteroidal anti-inflammatory drugs (NSAIDs). Though

Migraine Headache > View Full Topic
Disease Overview
Ferri's Clinical Advisor 2016 · Ferri, Fred F., M.D., F.A.C.P.

Definition

Migraine headaches are recurrent headaches that are either preceded by a focal neurologic symptom (migraine with aura), occur independently without preceding focal neurologic symptoms (migraine without aura), or have atypical presentations (migraine variants). The migraine aura typically is characterized by visual or sensory symptoms that develop over 5 to 60 min. If aura includes motor weakness, the migraine is referred to as hemiplegic. In migraine with and without aura, the headache is typically unilateral, pulsatile, and associated with nausea and vomiting, photophobia, and phonophobia. Migraines that occur ≥ 15 days every month for ≥ 3 months are known as chronic; otherwise, they are referred to as episodic.

CARING FOR YOUR CHILD WITH ASTHMA

Copyright © 2011 by Saunders, an imprint of Elsevier, Inc..
Last revised: June 2, 2012.

In asthma, normal airflow in airways (bronchi) is blocked. It most often starts in childhood. Children have small airways, so their asthma is especially serious.

Asthma attacks may be caused by pollen, dust, dander, smoke, cold weather, flu, and stress.

Symptoms include wheezing, coughing, chest tightness, and

Asthma across the ages: Knowledge gaps in childhood asthma

Journal of Allergy and Clinical Immunology, The.

Szefer, Stanley J., MD; Chmiel, James F., MD, MPH... Show all. Published January 1, 2014. Volume 133, Issue 1. Pages 3-13. © 2013.

Fig 1 Airway inflammation in the setting of asthma. The orange box represents activities in the lymph node. The dendritic cell (DC) processes antigens, migrates to the lymph nodes, and associates with TH 0, which then differentiates and migrates back to the airway. A, Noneosinophilic/neutrophilic asthma, B, Eosinophilic asthma. Remodeling occurs in patients with all forms of asthma but is only shown in Fig 1, B. EPO, Eosinophil peroxidase; ICAM-1, intercellular adhesion molecule 1; LTB₄, leukotriene B₄; Mφ, macrophage; MBP, major basic protein; MMP, matrix metalloproteinase; PAF, platelet-activating factor; Treg, regulatory T cell; TSLP, thymic stromal lymphopietin.

Asthma in Children

Disease Overview [View Full Topic](#)

Conn's Current Therapy 2016 · Bope, Edward T., MD; Kellerman, Rick...

Epidemiology

Asthma prevalence in the United States has been on the rise since the 1990s. It is currently estimated that 9.6% of children younger than 18 years (7.1 million children) carry the diagnosis of asthma. Male sex, African American or Puerto Rican ethnicity, and lower socioeconomic status are associated with an increased risk of developing asthma. Prevalence estimates for these groups are as high as 11% to 16%.

Asthma has a significant impact on both school attendance and health care expenditures. According to the National Health Statistic Report in 2007, children made 640,000 emergency department visits and were hospitalized 157,000 times as a result of asthma. In 2008 it was estimated that there were 10.5 million missed school days, and about 5% of children reported long-term limitations on their usual activities due to asthma symptoms.

Guidelines

راهنماها

برای پیدا کردن راهنماهای بالینی از قسمت Guidelines استفاده می کنیم. به عنوان مثال یک راهنما در مورد نحوه رفتار با بیمار مبتلا به پارکینسون می خواهیم

The screenshot shows the ClinicalKey website interface. The browser address bar displays the URL: https://www.clinicalkey.com/#!/content/nice_guidelines/65-s2.0-. The page title is "Parkinson's disease in over 20s: diagnosis and management (CG35)". The page is categorized under "Guidelines" and "Parkinson disease". The main content area is titled "GUIDELINE Parkinson's disease in over 20s: diagnosis and management (CG35)" and is attributed to the "National Institute for Health and Care Excellence (NICE)". The page includes a table of contents on the left with sections such as "Introduction", "Patient-centred care", "Key priorities for implementation", and "1 Guidance". The main text under "Introduction" states: "Parkinson's disease (PD) is a progressive neurodegenerative condition resulting from the death of the dopamine-containing cells of the substantia nigra. There is no consistently reliable test that can distinguish PD from other conditions that have similar clinical presentations. The diagnosis is primarily clinical, based on a history and examination." Below this, it mentions that "People with PD classically present with the symptoms and signs associated with parkinsonism, namely bradykinesia, rigidity and rest tremor." and that "Parkinsonism can also be caused by drugs, and conditions that are less common than PD. These include multiple cerebral infarction and degenerative conditions such as progressive supra-nuclear palsy (PSP) and multiple system atrophy (MSA)." The page also includes sections for "Health and resource implications" and "Introduction". A blue arrow points to the word "GUIDELINE" in the title. A vertical "Help & Feedback" button is visible on the right side of the page.

Clinical trials

کار آزمایی بالینی

کار آزمایشی بالینی یک مطالعه پزشکی به منظور ارزشیابی و مشاهده اثر یک مورد معین در سلامت فرد می باشد. ثبت کارآزمایی بالینی منجر به جلوگیری از انجام مطالعات تکراری می شود. برای جستجوی این موارد از قسمت clinical trials استفاده کرده ، کلمه یا عبارت مورد جستجو را در کادر جستجو درج می کنیم:

The screenshot shows the ClinicalKey website interface. At the top, there is a navigation bar with 'English', 'CME', 'Login', and 'Register' options. The main header features the 'ClinicalKey' logo and the tagline 'Lead with answers.'. Below the header is a search bar containing the text 'pancreatic cancer'. A dropdown menu is open, displaying search results organized into four columns: 'Suggestions', 'Related', 'Books and Journals', and 'Authors'. The 'Suggestions' column lists terms like 'pancreatic cancer', 'islet cell carcinoma', and 'Secondary malignant neoplasm of pancreas'. The 'Related' column includes 'chemotherapy', 'gemcitabine', and 'radiation therapy'. The 'Books and Journals' column shows 'Molecular Diagnostics & Treatment of Pancreatic Cancer'. The 'Authors' column lists various research groups such as 'NSW Pancreatic Cancer Network' and 'Dutch Pancreatic Cancer Group'. On the right side of the page, there is a vertical 'Help & Feedback' button and social media icons for Facebook, LinkedIn, Twitter, and Google+. The footer contains the Elsevier logo, contact information, and copyright details for 2016.

Pancreatic Cancer
Disease Overview > View Full Topic
Goldman-Cecil Medicine · Goldman, Lee, MD; Schafer, Andrew I., MD

- ◆ **Definition**
Pancreatic cancer usually refers to ductal adenocarcinomas of the pancreas, because more than 90% of pancreatic tumors arise from the ductal epithelium. Other major tumors of the pancreas include endocrine malignancies (Chapter 195), carcinoid tumors (Chapter 232), lymphomas (Chapter 185), and a variety of rare sarcomas.
- ◆ **Epidemiology**
Pancreatic ductal adenocarcinoma (PDAC) has one of the highest incidence-to-mortality ratios of any disease. Although it represents the tenth leading cause of cancer in the United States, it is the fourth leading cause of cancer-related deaths, ¹ because the vast majority of patients will die from their disease. Annually, approximately 40,000 individuals will die in the United States from PDAC or its complications. The

CLINICAL TRIAL

Safety Study of Nivolumab With Nab-Paclitaxel Plus or Minus Gemcitabine in Pancreatic Cancer, Nab-Paclitaxel / Carboplatin in Stage IIIB/IV Non-Small Cell Lung Cancer or Nab-Paclitaxel in Recurrent Metastatic Breast Cancer

First received on December 3, 2014. Last updated on March 30, 2016.

Purpose

The purpose of this study is to assess safety of nab-paclitaxel based chemotherapy regimens administered prior to and/or in combination with nivolumab in Pancreatic Cancer, Non Small Cell Lung Cancer (NSCLC) and Metastatic Breast Cancer (mBC).

Status	Recruiting
Condition	Breast Neoplasms
Phase	Phase 1
